

Job Search & Career Profile Session

Date: June 13, 2026

1. LinkedIn "About" Section

Aspiring Data Analyst | Power BI & DAX | Python | AI Enthusiast

Final-year B.Tech CSE (Data Science) student passionate about turning raw data into actionable insights through dashboards, visualizations, and AI-powered tools.

Currently working as a Data Analytics Intern at Thiranex, applying Power BI, DAX, and Excel to build interactive dashboards for sales, revenue, and environmental health analytics. Also completed the IBM AI Internship, gaining hands-on exposure to AI fundamentals and applications.

Key Projects: - Sales & Revenue Analysis Dashboard (Power BI) - NutriScope - AI Nutrition Analytics App - Environmental Health Analyzer Dashboard - ATS Resume Optimizer - Personal Portfolio Website

Skills: Power BI, DAX, Excel, Python, C++, Java, Data Visualization, Git/GitHub, AI Tools (Claude, ChatGPT)

Currently participating in the "60 Days of Claude AI Challenge" to deepen AI application skills, and actively sharpening problem-solving abilities on LeetCode and GeeksforGeeks.

Open to opportunities in Data Analytics, Business Intelligence, and AI-driven product development.

2. Job Search (Initial - Web Search Based)

Matching Opportunities

1. Data Analyst - NiceInfotech - Location: Noida - Experience Required: 1-4 yrs - Apply: placementindia.com/job-detail/data-analyst-in-niceinfotech-at-noida-1357980.htm - Expected CTC: ~3.5-6 LPA (est.) - Match Score: 75/100 - Why it fits: Role centers on Power BI dashboards, Excel, and turning data into insights - aligns with Sales & Revenue Dashboard project. SQL is a gap.

2. Technology Analyst Trainee - ViviRooms Ecomm Pvt Ltd - Location: Noida Sector 63A - Experience Required: 0-1 yrs (fresher-friendly) - Apply: placementindia.com/job-detail/technology-analyst-in-vivirooms-ecomm-private-ltd-at-sector-63a-noida-sector-63-noida-1290017.htm - Expected CTC: ~1-3 LPA (trainee level) - Match Score:

80/100 - Why it fits: Designed for freshers with Excel, SQL, Power BI/Tableau exposure. Good stepping-stone for internship-to-full-time conversion.

3. Data Analytics (Placement Drive) - Edubridge Learning Pvt Ltd - Location: Delhi/Patparganj - Experience Required: 0-1 yrs, B.Tech CS/IT preferred - Apply: placementindia.com/job-detail/data-analytic-jobs-in-delhi-patparganj-for-edubridge-learning-pvt-ltd-995710.htm - Expected CTC: 4-5 LPA - Match Score: 85/100 - Why it fits: Fresher-targeted, B.Tech CS background matches eligibility, salary band matches target, structured placement pipeline (leads to ZS Associates).

4. Data Analyst (0-2 yrs, up to 6 LPA) - Razorwireai - Location: Multiple (Gurgaon, Pune, Jaipur, Hyderabad, etc.) - Apply: placementindia.com/job-detail/data-analyst-0-2-exp-upto-6lpa-jobs-in-vijayawada-kakinada-east-godavari-for-razorwireai-1129710.htm - Expected CTC: Up to 6 LPA - Match Score: 70/100 - Why it fits: Salary matches range, locations include preferred cities. Requires Python/SQL/cloud (GCP/AWS) - partial gap.

5. Junior Data Analyst / MIS Reporting Roles - via Internshala - Location: Remote, Hybrid, various NCR locations - Apply: internshala.com/jobs/junior-data-analyst-jobs/ - Expected CTC: 2.5-5 LPA - Match Score: 78/100 - Why it fits: Requires strong Excel (pivot tables, VLOOKUP/XLOOKUP), data analysis and reporting, with Power BI/SQL as a plus. Explicitly open to freshers.

6. Power BI Developer (Process Mining) - Transitials - Location: Noida Sector 16 (Hybrid) - Experience Required: 5-10 yrs (not fresher-suitable - for awareness only) - Expected CTC: 13 LPA - Match Score: 30/100 - Why mentioned: Benchmark for senior Power BI/DAX career path in 3-5 years.

Skill Gap Analysis (Initial)

Skill	Your Level	Market Demand	Gap
SQL	Not listed	Very High	Critical gap - learn basic SQL urgently
Power BI / DAX	Strong	Very High	Well covered
Excel (Advanced)	Good	Very High	Strengthen VBA/macros
Python	Basic	Medium-High	Sufficient for entry-level
Cloud (Azure/AWS/GCP)	None	Medium (growing)	Optional but adds edge
Communication/Reporting	Unknown	High	Highlight via project presentations

Market Demand Insights

- Hundreds of active Data Analyst/Power BI listings in Delhi NCR, with Noida and Gurgaon as hotspots.
- SQL is the most repeated requirement across nearly every fresher-

level posting.

- Salary for fresher Data Analyst/MIS roles clusters at 2.5-6 LPA.
- Hybrid/WFH options increasingly common for entry-level BI/reporting roles.

Recommendations (Initial)

1. Learn SQL immediately (2-3 weeks focused effort).
2. Add a SQL + Power BI combo project to portfolio.
3. Quantify dashboard projects on resume with metrics.
4. Target Tier-2 fresher-focused companies and placement-driven programs.
5. Apply to Internshala “internship-to-full-time” listings.
6. Use GitHub actively - link projects directly in applications.
7. Avoid recruiter-aggregator senior listings (4+ yrs exp).

Overall Fit Assessment (Initial)

Strong fit (75-85% match) for entry-level Data Analyst, Junior Data Analyst, and MIS/Reporting Analyst roles in Delhi NCR. Biggest gap is SQL - closing this would raise match scores by 10-15 points. Salary expectations (4-8 LPA) realistic for SQL+Power BI-equipped freshers; Tier-2/consulting/startup roles in 3-6 LPA band are most achievable near-term targets.

3. Job Search (Via Indeed Connector)

Top Matching Opportunities

Company	Role	Location	Posted	Application I
Brightbots Private Limited	Data Analyst Intern	Gurugram / Delhi NCR	Jun 4, 2026	https://to.indeed.com/aæ
V Patrol AI Pvt Ltd	Data Analyst Intern (Business Analyst track)	Gurugram, Haryana	May 15, 2026	https://to.indeed.com/aæ
Analytics Career Connect	Data Analyst Intern	Remote	Jun 9, 2026	https://to.indeed.com/aæ
MARKET TIMES TV	Market Research Analyst	Noida, UP	Jun 10, 2026	https://to.indeed.com/aæ

◀ ▶

Excluded: Senior/specialist roles (5+ yrs experience, e.g., SITA's Power BI/Fabric role, Selsoft Power BI Developer), unrelated tech roles (JumpCloud security engineering, PHP Developer), and an Insurance Product Analyst role with no BI/data overlap.

Most Commonly Required Skills Across These Jobs

Advanced MS Excel (pivot tables, VLOOKUP/XLOOKUP, charts) appears in every listing as a baseline. SQL and Power BI/Tableau are consistently listed as “preferred” or “a plus” rather than mandatory at this level - meaning existing Power BI/DAX strength is a differentiator. Basic Python, data validation/quality checks, and report/dashboard generation for MIS or management reporting are recurring themes. Strong written/verbal communication and stakeholder-facing presentation skills are explicitly called out in nearly all postings.

Skill Gap Analysis

Core stack (Power BI, DAX, Excel, basic Python) already exceeds the baseline for these fresher internship roles. Main gap remains SQL: while listed as “preferred” rather than required here, it appears across nearly all listings and would push match scores from 70-88 range toward 90+ on stronger full-time roles. Secondary gap: formal market-research or stakeholder-presentation experience.

Market Demand Insights

Current Indeed listings for Delhi NCR/Bengaluru/Pune/Hyderabad skew heavily toward internship-level Data Analyst roles (3-6 month durations, Rs.10,000-16,000/month, with PPO potential) rather than direct full-time fresher Data Analyst hires. This suggests the market is funneling freshers through paid internships with conversion potential, aligning well with the stated preference for “internship-to-full-time” opportunities. Pune and Hyderabad showed no fresher-relevant Power BI/MIS results in this search window.

Recommendations to Improve Interview Chances

Apply to the Brightbots and V Patrol AI internships now - both explicitly welcome freshers and list the exact toolset as either required or “a plus,” making them the highest-probability near-term offers. Add a basic SQL project (even querying a sample database and connecting it to Power BI) to the portfolio before applying further. For the MARKET TIMES TV role, foreground dashboard/analytics projects as “data-driven research” to bridge the gap. Set up Indeed job alerts for “Data Analyst,” “Power BI,” and “MIS” combined with Noida/Gurugram/Remote.

Overall Fit Assessment

For target roles (Data Analyst, Junior Data Analyst, BI Analyst, Power BI Developer, Reporting/MIS Analyst) and compensation goal (4-8 LPA), the current Indeed market in preferred locations is dominated

by internship-stage entry points (1.2-2 LPA, internship-to-FTE) rather than direct 4-8 LPA full-time roles - typical for the fresher segment. The skillset is a strong match for available internship-tier roles (Brightbots, V Patrol AI), representing realistic next steps; the 4-8 LPA full-time band becomes more reachable after adding SQL and accumulating 6+ months of internship experience.
