

Job Search & Personal Branding Toolkit

Vivek Gautam — Data Analyst (Fresher)

Vivek Gautam — Job Search & Personal Branding Toolkit

Target Role: Data Analyst (Fresher) | **Target Industry:** Data Analytics, Business Intelligence, AI & Technology

SECTION 1: ATS-Friendly Cover Letter

Dear Hiring Manager,

I am writing to express my interest in entry-level Data Analyst opportunities at your organization. As a Computer Science & Engineering (Data Science) undergraduate at ABES Engineering College with hands-on experience in Power BI, DAX, and data visualization, I am confident in my ability to contribute meaningfully to your data and analytics team.

During my Data Analytics Internship at Thiranex, I developed interactive sales and revenue dashboards using Microsoft Power BI, enabling data-driven decision-making for cross-functional stakeholders. I applied KPI tracking, DAX calculations, and data filtering techniques to translate raw data into actionable business insights. This experience strengthened my ability to collect, clean, and analyze data from multiple sources to identify trends and performance patterns.

One of my key projects, the Sales & Revenue Analysis Dashboard, involved analyzing 118.73M in total sales and 16.89M in profit across products, countries, and time periods. I built KPI cards for Total Sales, Total Profit, Units Sold, Profit Margin (%), and Country Coverage, and created custom DAX measures for advanced analytical insights. Through this analysis, I identified the top-performing product (Paseo), the highest revenue market (United States), and the peak sales month (December) — insights that demonstrate my ability to convert data into strategic business value.

Beyond Power BI, I am also working on additional projects, including an AI-powered nutrition analytics application, a personal environmental health analyzer, and an AI-driven resume optimizer, reflecting my growing interest in applying analytical and AI skills to real-world problems. I am currently expanding my exposure to AI through an internship at IBM and continuously sharpening my problem-solving abilities through DSA practice on LeetCode and GeeksforGeeks.

My core skill set includes Microsoft Power BI, DAX, Microsoft Excel, Python, data cleaning, exploratory data analysis, and dashboard development, supported by strong fundamentals in data structures, algorithms, and object-oriented programming. I document and present my work through structured GitHub repositories, demonstrating both technical competence and clear communication.

I am eager to bring my analytical mindset, attention to detail, and passion for data-driven storytelling to a Data Analyst role at your organization. I would welcome the opportunity to discuss how my skills and enthusiasm for continuous learning can add value to your team.

Thank you for considering my application. I look forward to the possibility of contributing to your organization's success.

Sincerely, Vivek Gautam +91 9170343713 |

SECTION 2: Recruiter Outreach Email

Subject: Aspiring Data Analyst | Power BI, DAX & Data Visualization Skills | Open to Opportunities

Hi [Recruiter's Name],

I hope you're doing well. I'm Vivek Gautam, a Computer Science & Engineering (Data Science) undergraduate at ABES Engineering College, currently seeking entry-level Data Analyst roles in the Data Analytics, Business Intelligence, and AI & Technology space.

I recently completed a Data Analytics Internship at Thiranex, where I built interactive Power BI dashboards using DAX, KPI tracking, and data visualization to support business reporting. In one project, I analyzed 118.73M in sales and 16.89M in profit, building KPI cards and custom DAX measures to surface insights like top-performing products and peak sales periods.

I'm also currently part of an AI Internship at IBM and working on projects involving AI-driven analytics applications, which I believe align well with the evolving needs of data teams today.

I'd love to learn about any Data Analyst (Fresher) openings at [Company Name] and how I might be a good fit. I've attached my resume for your reference and would appreciate any guidance you can offer.

Thank you for your time and consideration.

Best regards, Vivek Gautam +91 9170343713 |
vivek.official0407@gmail.com linkedin.com/in/vivek-gautam-a4b478323

SECTION 3: Hiring Manager Email

Subject: Application for Data Analyst (Fresher) Role - Vivek Gautam

Dear [Hiring Manager's Name],

I'm reaching out regarding Data Analyst opportunities within your team at [Company Name]. As a final-year-track Computer Science & Engineering (Data Science) student with practical experience in Power BI, DAX, and business reporting, I believe I could add value to your analytics function.

In my recent internship with Thiranex, I built end-to-end Power BI dashboards analyzing 118.73M in total sales and 16.89M in profit, creating KPI cards, custom DAX measures (including Profit Margin %

and Distinct Country Count), and trend visualizations that supported data-driven decisions. I also documented the entire workflow on GitHub, from data cleaning to final dashboard delivery.

Alongside this, I'm currently strengthening my AI skill set through an internship at IBM, and applying analytics and AI concepts in personal projects such as an AI nutrition analytics app and an environmental health analyzer.

I would welcome the chance to discuss how my analytical foundation, dashboard-building experience, and eagerness to learn could support your team's goals. I'm happy to share my portfolio, GitHub repositories, and project documentation at your convenience.

Thank you for your time, and I look forward to the possibility of connecting.

Best regards, Vivek Gautam +91 9170343713 |

SECTION 4: LinkedIn Connection Request (≤300 characters)

Hi [Name], I'm a Data Science undergrad with hands-on Power BI/DAX experience from a Data Analytics internship. I'm exploring Data Analyst (Fresher) roles and would love to connect and learn from your journey in the field. Thank you!

(247 characters)

SECTION 5: Referral Request Message

Hi [Name],

I hope you're doing well! I noticed you're working at [Company Name], and I wanted to reach out as I'm currently exploring Data Analyst (Fresher) opportunities in the Data Analytics/BI space.

A quick background: I'm a Computer Science & Engineering (Data Science) undergraduate with hands-on experience from a Power BI-focused Data Analytics internship at Thiranex, where I built dashboards analyzing 118.73M in sales and 16.89M in profit using DAX and KPI reporting. I'm also currently doing an AI internship at IBM and working on a few personal AI/analytics projects.

If [Company Name] has any open Data Analyst (Fresher) roles, I'd be really grateful if you could refer me or point me to the right person/process. I'm happy to share my resume, GitHub, and project portfolio.

Thanks so much for considering — I really appreciate it!

Best, Vivek Gautam +91 9170343713 | vivek.official0407@gmail.com

SECTION 6: Follow-Up Email (Send after 5 days if no response)

Subject: Following Up - Data Analyst Application (Vivek Gautam)

Hi [Name],

I hope you're doing well. I wanted to briefly follow up on my application/email from last week regarding Data Analyst (Fresher) opportunities at [Company Name].

I remain very enthusiastic about the possibility of contributing to your team — particularly given my hands-on experience with Power BI dashboards, DAX measures, and data-driven reporting from my internship at Thiranex, where I worked with datasets covering 118.73M in sales and 16.89M in profit.

I understand you're likely managing a high volume of applications, so I just wanted to check if there's any update on the role, or if you'd need any additional information from my end (resume, GitHub portfolio, or project documentation).

Thank you again for your time and consideration.

Best regards, Vivek Gautam +91 9170343713 |

SECTION 7: 30-Second Professional Introduction

"Hi, I'm Vivek Gautam, a Computer Science & Engineering student specializing in Data Science at ABES Engineering College. I'm passionate about turning raw data into actionable business insights using tools like Power BI, DAX, and Excel. During my Data Analytics internship at Thiranex, I built interactive dashboards analyzing over 118 million in sales and 16.89 million in profit, identifying key trends like top-performing products and peak sales periods. I'm currently expanding into AI through an internship at IBM, and I've built a few personal projects — including an AI-powered nutrition analytics app and an environmental health analyzer — to apply data analysis and AI together. I'm excited to bring this analytical mindset and curiosity to a Data Analyst role where I can help teams make smarter, data-backed decisions."

SECTION 8: Top 10 Job Titles Best Suited for Your Profile

1. Data Analyst (Fresher/Entry-Level)
 2. Business Intelligence (BI) Analyst – Trainee
 3. Power BI Developer (Junior/Associate)
 4. Junior Data Analyst – Analytics Reporting
 5. Business Analyst (Entry-Level/Trainee)
 6. Data Visualization Analyst (Junior)
 7. MIS Executive / Reporting Analyst
 8. Associate Data Analyst – Consulting (Graduate Trainee)
 9. Junior Analytics Consultant
 10. Graduate Trainee – Data & Analytics
-

SECTION 9: Key Strengths Recruiters Will Notice

- **Practical Power BI/DAX experience** through a real internship (Thiranex), not just coursework — backed by a portfolio dashboard analyzing 118.73M in sales
- **Quantified business impact:** ability to translate raw data into

measurable KPIs (Total Sales, Profit Margin %, Units Sold, Country Coverage)

- **Custom DAX measure creation** (Profit Margin %, Distinct Country Count) — shows analytical depth beyond basic reporting
- **Strong CS foundation:** data structures, algorithms, and OOP, giving an edge for analytics roles needing scripting/automation
- **Active GitHub presence** for documenting and version-controlling analytics work — signals transparency and professionalism
- **Diversified AI exposure** via IBM AI internship and AI-based personal projects (nutrition analytics, environmental health analyzer, resume optimizer)
- **Consistent upskilling habit:** daily DSA practice on LeetCode/GeeksforGeeks, plus structured AI learning (60 Days of Claude AI Challenge)
- **Communication & presentation skills:** experience documenting and presenting project outcomes through structured reports

SECTION 10: Skill Gap Analysis

Current Strengths

- Microsoft Power BI (dashboard development, KPI cards, interactive visuals)
- DAX (custom measures, calculated fields)
- Microsoft Excel (data analysis, reporting)
- Python, C, Java fundamentals
- Data cleaning, exploratory data analysis (EDA), trend analysis
- Data structures & algorithms, OOP fundamentals
- GitHub for version control and project documentation

Missing/Underdeveloped Skills (relative to target roles at TCS, Infosys, Accenture, etc.)

- SQL (database querying — critical for almost all Data Analyst roles)
- Advanced Excel (Pivot Tables, VLOOKUP/XLOOKUP, Power Query, macros)
- Statistics & probability fundamentals for analytics
- Python data libraries (Pandas, NumPy, Matplotlib/Seaborn)
- Tableau (alternative BI tool, often listed alongside Power BI in job descriptions)
- Cloud/data platform exposure (Azure, AWS, or Google Cloud basics)
- Formal certifications (e.g., Microsoft PL-300, Google Data Analytics Certificate)

Recommended Learning Roadmap (Next 3-6 Months)

1. **Month 1-2:** Master SQL (joins, aggregations, subqueries, window functions) — highest priority for ATS/recruiter screening
2. **Month 2-3:** Advanced Excel (Pivot Tables, Power Query, advanced formulas) + Python with Pandas/NumPy for data manipulation
3. **Month 3-4:** Statistics fundamentals (descriptive stats, probability, hypothesis testing) applied to real datasets
4. **Month 4-5:** Tableau basics to broaden BI tool versatility; pursue Microsoft PL-300 (Power BI Data Analyst) certification
5. **Month 5-6:** Cloud fundamentals (Azure Data Fundamentals or AWS Cloud Practitioner) and one end-to-end SQL+Power BI capstone project for portfolio

SECTION 11: Personal Brand Summary

Unique Value Proposition

Vivek combines hands-on Power BI/DAX dashboarding experience with a strong computer science foundation and an active interest in AI-driven analytics — bridging traditional BI skills with emerging AI tools to deliver actionable, well-documented business insights.

Professional Positioning Statement

“An aspiring Data Analyst with proven, project-based experience in Power BI and DAX, a solid CS & Data Science academic foundation, and growing AI capabilities — focused on transforming raw business data into clear, actionable insights that support smarter decision-making.”

Recruiter Headline

Aspiring Data Analyst | Power BI & DAX | Data Visualization & BI Reporting | CS & Data Science Undergrad | AI Enthusiast (IBM AI Intern)

SECTION 12: Interview Talking Points

Most Impressive Achievements

- Built a complete Sales & Revenue Analysis Dashboard analyzing 118.73M in sales and 16.89M in profit across products, countries, and time periods
- Created custom DAX measures (Profit Margin %, Distinct Country Count) demonstrating analytical depth beyond default visuals
- Identified actionable business insights (top product: Paseo; top market: United States; peak month: December) from raw data
- Published full project documentation and dashboard assets on GitHub for version-controlled reporting

Key Stories to Discuss

- **The Dashboard Build Story:** Walk through how you approached the Sales & Revenue Dashboard — from data cleaning to KPI design to final insights — and how those insights could drive a real business decision (e.g., focusing marketing spend in December or doubling down on the US market)
- **The DAX Problem-Solving Story:** Describe a specific challenge while creating a custom DAX measure (e.g., Profit Margin %) and how you solved it
- **The Internship Story:** How the Thiranex internship simulated real-world cross-functional reporting and what you learned about presenting data to non-technical stakeholders
- **The Growth/Learning Story:** How you're proactively expanding into AI (IBM internship, AI-based projects) to stay ahead of evolving analyst role requirements

Areas Recruiters Are Likely to Ask About

- SQL proficiency (be ready to acknowledge it's an active learning area and describe your roadmap)
- How you'd approach a messy/unclean dataset (walk through your data cleaning process from the dashboard project)
- Difference between a measure and a calculated column in DAX (be ready with a clear, simple explanation)

- Why Data Analytics/BI as a career path (tie back to your enjoyment of turning data into insights via Power BI project)
- How you stay current with tools/trends (LeetCode/GFG practice, Claude AI challenge, IBM AI internship)
- Your comfort with ambiguity and self-directed learning, given multiple concurrent internships and personal projects
